

EDUCATION

Bachelors in Computer Science

Expected: May 2025

Arizona State University (ASU), Tempe, AZ

GPA - 3.54/4.00

Relevant Coursework – Data Structures and Algorithms, Object Oriented Programming, Distributed Software Development, Software Engineering, Operating Systems, Digital System Design, Mobile Application Development, and Cloud Computing

WORK EXPERIENCE

Software Engineer Intern, Coinbase

Oct 2024 – Present

- Migrated blockchain data-fetching code from a legacy pipeline to **AWS S3** using **Python** and **Go**, improving efficiency.
- Optimized data processing pipeline, by **50%**, reducing latency and increasing system throughput.
- **Automated** Slack channels discovery for pull requests, saving engineers **10** hours per week.
- Developed production-grade **ETL processes** using **SQL**, **Apache Airflow**, and **Go** to enhance transaction accuracy.

Software Developer Intern, ContextQA

May 2024 – July 2024

- Developed graph-based storage for QA test cases, enabling **visualization**, **optimization**, and **impact analysis**.
- Automated end-to-end test generation via graphs using **ChatGPT API**, improving QA efficiency.
- Built an **auto-healing** feature to preserve test integrity during site updates and upgrades.
- Developed an extraction model with **BeautifulSoup** and **NLP** to classify interactive web elements accurately.

Teaching Assistant, Arizona State University (Principles of Programming with Java)

Oct 2022 – Oct 2024

- Managed a class of **180+** students and held office hours for doubts, discussions, reviews.
- Conducted review sessions that enhanced exam preparedness, increasing student engagement by **35%**
- Assisted the professor in revising the lecture content and **research** projects.
- Advised students individually on assessments and activities, fostering academic growth.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C, C#, Go, Swift, SQL, HTML, CSS, Ruby**Frameworks:** React, Node.js, Next.js, Vue.js, AngularJS, Tailwind, Flask, .NET, Pandas, SwiftUI, TensorFlow, PyTorch**Tools & Technologies:** Git, GitHub, AWS (Cloud, RDS), REST APIs, MySQL, PostgreSQL, SQLite, Firebase, Terraform, ServiceNow, Datadog, Spark, Splunk, JIRA, Redis, MongoDB, Postman, Snowflake, Jupyter, Windows, macOS

ACADEMIC PROJECTS

Reyts Fintech Inc. | *React Native, Typescript, Firebase*

- Developed a fintech P2P currency exchange app using **React Native and Firebase**, implementing multi-factor authentication and secure transactions, improving financial security by **60%**.
- Integrated dynamic currency conversion, **API-driven** exchange rate updates, and **Firestore** for seamless P2P transactions, reducing transaction processing time by **40%**.
- Designed an interactive dashboard with **Tailwind CSS** and **React Navigation**, optimizing user experience and financial tracking leading to **35%** higher user engagement.

Smart Meal Planner | *Swift, SwiftUI, Firebase, Mapkit*

- Built a meal planning app with **SwiftUI** and **Firebase**, enabling users to schedule meals, generate grocery lists, and receive personalized recipe recommendations, saving user time to decide daily meals by **40%**
- Integrated a grocery store locator with **MapKit** for real-time searches and tailored meal suggestions using **Recipe API**, to enhance meal planning by **30%** and streamlining grocery shopping.

Geo Construct Services | *C#, ASP.NET, WCF, XML*

- Developed and deployed a disaster tracking web platform with **C# and ASP.NET**, integrating earthquake and weather **APIs** through **WCF, WSDL, SOAP, and RESTful services**, improving real-time data retrieval by **45%**.
- Implemented comprehensive security features, including **encrypted** passwords and **CAPTCHA**, leading to a **60%** reduction in security incidents, and optimized dynamic **XML** file handling.

Gym Progress Tracker | *Python, Flask, SQLite*

- Developed a fitness tracking app with **Flask**, allowing users to log workouts, track progress, and set goals, increasing daily workout consistency by **40%**.
- Implemented data visualization with **Matplotlib** and **Pandas**, providing **interactive charts and insights** for strength progression and calorie burn trends, enhancing user engagement and fitness tracking efficiency.

VOLUNTEER & EXTRACURRICULAR EXPERIENCE

CodePath Technical Interview Prep

Jun 2024 – Aug 2024

- Participated in meetings, collaborated with peers to solve **Leetcode** problems, and deepened my understanding of technical interview techniques, focusing on **Data Structures and Algorithm**
